PROFESSIONAL SUMMARY

I am a Frontend web developer having 5.1YOE in building client satisfied web applications with stack including ReactJS, NextJS, Javascript, TailwindCSS, HTML, CSS/LESS.

Apart from developing code, I also involve in testing the code with Jest, RTL which helps me in delivering the best product to the client having clean code with no flaws.

WORK EXPERIENCE

Accenture | Application Dev Sr Analyst

Bangalore, India | Jun 2021 – Present

- I have been working in developing an application that deals with the user submitted records and keep tracking of it. This involves Authentication, managing states centrally through Redux, creating reusable components using AntD, code management through github.
- Tech stack included ReactJS, AntD, CSS, Javascript, github.
- I have worked in creating Functional design and configuration documents with thorough understanding of the retail domain functionalities which helped in understanding the Functional side of the project.
- Worked in developing an application using ReactJS where users can access & track their submitted requests. This application has developed adapting latest web accessibility standards so that visually impaired can also access the application with ease.
- Developed a case management portal using NextJS and Stencil framework and getting it deployed into the CI CD pipeline through code commit.

User will be provided with a service where he can submit a form and the respective team addresses the ticket and resolves the issue.

Tech Stack: ReactJS, NextJS, TailwindCSS, Javascript, Redux, Jest/RTL, HTML, CSS/LESS, Git, Jira, SonarQube, AWS (code-commit).

Tata Consultancy Services | System Engineer

Bangalore, India | Jan 2019 – May 2021

- Developed a portion of web application like online learning platform, wherein user able to buy courses. I have also involved in Jest/React testing library to perform unit testing for the code developed also involved in performing QA which helped me to code in efficient way, Cypress used in performing QA.
- Worked as a verification and validation engineer in Avionics domain, where I supposed to develop test cases to ensure quality of the code.

Tech Stack: ReactJS, TailwindCSS, Javascript, Jest/RTL, HTML, CSS, Git, Cypress.

PROJECTS

[PORTFOLIO APP](#)  ReactJS, PWA, TailwindCSS, Javascript, Git.

Developed portfolio web application which contains a contact form wherein user can reach to the configured mailid. This has been achieved using EmailJS library.

To access the application offline PWA has used which enables to install the application as a native web app.
